

The STOP skill is a distress tolerance technique from Dialectical Behavior Therapy (DBT) that helps you manage impulsive behaviors and emotions, which are common challenges for individuals with ADHD. Use this worksheet to guide you through the STOP steps when you feel overwhelmed, distracted, or triggered.

## S - Stop

When you notice that you are feeling overwhelmed or about to react impulsively, just STOP. Pause immediately.

- Questions to Ask:
- What situation triggered my intense emotions?
  - How do I feel right now?
  - What impulsive reaction am I trying to prevent?

## T - Take a Step Back

Physically and mentally take a step back from the situation. This could mean leaving the room, taking a deep breath, or simply pausing your actions and thoughts.

- Questions to Ask:
- How can I create a brief moment of distance from my current situation?
  - What helps me feel more grounded?

- Actions to Try:
- Take a few deep breaths.
  - Count to 10 slowly.
  - Excuse yourself from the situation momentarily.

## O - Observe

Observe what is happening inside and around you without judgment. Pay attention to your thoughts, feelings, and physical sensations, as well as what others are doing and saying.

- Questions to Ask:
- What am I feeling emotionally?
  - What physical sensations am I noticing?
  - What thoughts are going through my mind?
  - What is happening around me?

- Things to Observe:
- Emotions you are experiencing.
  - What others are saying or doing.
  - Heart rate, breathing, muscle tension.
  - Thoughts running through your mind.

## P - Proceed Mindfully

After you've taken a moment to stop, step back, and observe, proceed mindfully. Make a conscious choice about how to respond rather than reacting impulsively.

- Questions to Ask:
- What is the most effective way to handle this situation?
  - How can I respond in a way that aligns with my goals and values?
  - What can I do to take care of myself in this moment?

- Actions to Try:
- Think about your goals and values.
  - Choose a response that aligns with your long-term well-being.
  - Communicate calmly and assertively if necessary.
