

Self-Care for Trauma

Experiencing trauma can leave you feeling overwhelmed, vulnerable, and disconnected. **Prioritizing self-care is a crucial step in your healing journey, helping you to regain a sense of control, safety, and well-being.** A self-care routine is not one-size-fits-all but requires experimenting with different strategies to understand what works best for you. This worksheet is designed to guide you through various self-care practices that can support your mental, emotional, and physical health. Self-care is any technique that enhances your well-being and replenishes your mind and body.

You will be asked to rank each activity on a scale from 1-3 to determine how well you are currently engaging in these practices. After ranking, you can “star” the activities you would like to do more often. The goal of this worksheet is to help you recognize the different types of self-care available to you, identify what you are doing well, and pinpoint areas where you can improve to feel better overall.

Ranking

- 1 I rarely engage in this, and it is not a regular part of my routine.
- 2 I occasionally engage in this, but it is not consistent.
- 3 I regularly engage in this, and it is a frequent part of my routine.
- ★ I want to do this more frequently.
